人造草坪产品

Artificial turf products

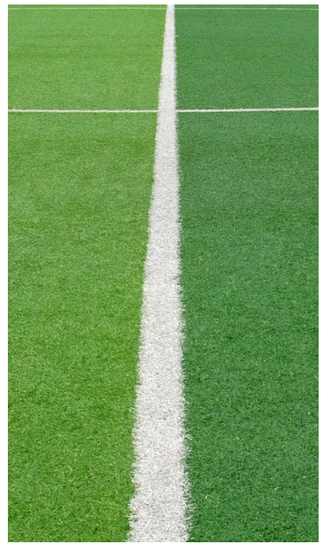

人造草坪系列 Artificial turf series

System Introduction

The Oriental Rainbow Artificial Lawn Series is a combination of artificial turf, quartz sand, rubber particles, and shock absorbers. It has the characteristics of bright appearance, good drainage performance, long service life, and low maintenance cost. Widely used in various sports venues such as football fields, basketball courts, tennis courts, hockey fields, golf courses, etc.

System Characteristics

Environmental friendliness

All materials in the venue meet environmental requirements;

Security

Ensure that athletes do not slip or scratch during exercise;

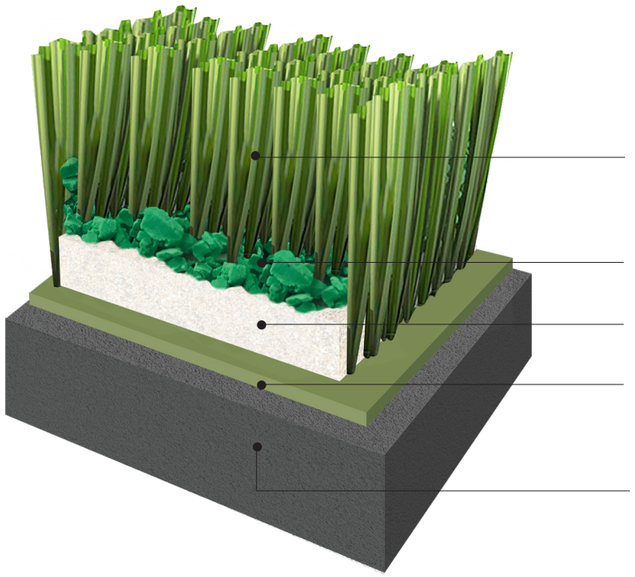

Durable and weather resistant

Suitable for various climatic environments, resistant to ultraviolet radiation, and long-lasting color retention;

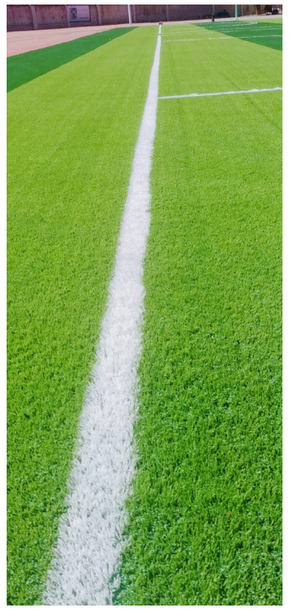

Economy

Easy to construct, can be laid on asphalt, cement, and hard sand sites with minimal maintenance costs.
